Paper ID

185

Paper Title

Multilingual Voice Based Vending Machine

Track Name

Robotics, Automation & Internet of Things

Reviewer #1

Questions

1. Structure of the paper

Good

2. Standard of language

Good

3. Appropriateness of the research/study method

Good

4. Relevance and clarity of drawings, graphs and tables

Good

5. Appropriateness of abstract as a description of the paper

Good

6. Use and number of keywords/key phrases

Good

8. Discussion and conclusions

Good

8. Reference list, adequate and correctly cited

Good

15. Recommendation

Strong accept and Manuscript requires routine editing only

Reviewer #2

Questions

1. Structure of the paper

The paper is well-structured, including a clear title, abstract, keywords, introduction, literature review, methodology, results, discussion, conclusion, and references. Each section logically follows the previous one, providing a coherent flow of information.

2. Standard of language

The language is clear, precise, and professional. Technical terms are appropriately used, and the writing is free from grammatical and typographical errors.

3. Appropriateness of the research/study method

The research method is suitable for the study's objectives. It is well-described, providing enough detail for reproducibility. The choice of methods is justified and aligns with the research questions.

4. Relevance and clarity of drawings, graphs and tables

The drawings, graphs, and tables are relevant to the content and contribute to the understanding of the results. They are clearly labeled, well-integrated into the text, and enhance the overall readability of the paper.

5. Appropriateness of abstract as a description of the paper

The abstract effectively summarizes the paper, including its objectives, methods, results, and conclusions. It provides a clear overview without going into excessive detail.

6. Use and number of keywords/key phrases

The paper uses an appropriate number of keywords and key phrases, which are relevant to the content and likely to assist in indexing and searchability.

8. Discussion and conclusions

The discussion interprets the results in the context of the research questions and existing literature. The conclusions are logical, based on the findings, and suggest potential implications and areas for further research.

8. Reference list, adequate and correctly cited

The reference list is comprehensive and includes relevant sources. Citations are correctly formatted and consistently applied throughout the paper.

15. Recommendation

Accepted and Manuscript requires minor revisions from author(s)

Questions

1. Structure of the paper

The structure of the paper can be improved by clearly delineating sections such as Introduction, Methodology, Results, and Conclusion. Each section should have a clear purpose and flow logically into the next, ensuring coherence and readability. Subheadings within sections can help organize content effectively.

2. Standard of language

1. Ensure consistent use of academic language and formal tone throughout the paper.
2. Clarify technical descriptions with precise language and avoid unnecessary jargon.

3. Maintain a structured flow in each section, starting from the introduction to the conclusion, ensuring coherence and logical progression.

3. Appropriateness of the research/study method

1. Clearly outline the research methodology and its alignment with the study objectives.
2. Ensure the methodological approach is systematically detailed from hardware design to software implementation.
3. Provide more explicit connections between the hardware design, software implementation, and user interaction aspects.

4. Relevance and clarity of drawings, graphs and tables

the figures are relevant

5. Appropriateness of abstract as a description of the paper

1. Expand on the specific contributions and findings of the paper.
2. Ensure the abstract aligns closely with the content of each section of the paper.
3. Clarify the objectives and outcomes of the Voice Based Vending Machine more explicitly.

6. Use and number of keywords/key phrases

Consider adding relevant keywords related to accessibility, vending machines, and technology integration.

Maintain a balance in the number of keywords to avoid overloading or under-representation.

8. Discussion and conclusions

1. Maintain a clear structure by summarizing key findings and their implications.
2. Ensure alignment with the research objectives and methodology.
3. Provide a concise recap of the study's contributions and potential future research directions.

8. Reference list, adequate and correctly cited

the references are correctly cited

15. Recommendation

Accepted and Manuscript requires minor revisions from author(s)
